

Accepted File Type List (Mac or PC)

	Software	Version	File Ext.
<b>Layout</b>	Quark XPress	9	.qxd
	Adobe InDesign	CS6	.indd
	<u>IMPORTANT:</u> These files often contain supporting graphics and fonts that should be sent along with the respective root file. Quark files should be collected for output and InDesign files should be packaged.		
<b>Vector Art</b>	Adobe Illustartor	CS6	.ai, .eps
	Adobe PDF	Any	.pdf
	<u>IMPORTANT:</u> These files often contain unique fonts that should converted to outlines or the fonts should be supplied with the respective file. Files should never have RGB properties.		
<b>Raster Art</b>	Adobe Photoshop	CS6	.tif, .bmp, etc.
	<u>IMPORTANT:</u> These files are classified as non-vector or rasterized art. Resolution should never be below 300 DPI (dots per inch). Scaling these files in layouts will effect the resolution. There is a wdie variety of acceptable file types. However, formats such as .jpg and .gif should be avoided becuase of color and compression issues.		
<b>Text</b>	Microsoft Word	Any	.doc, .docx
	Microsoft Excel	Any	.xls, .xlsx
	<u>IMPORTANT:</u> These files normally cannot be used for art purposes.		
<b>Archive</b>	StuffIt	Any	.sit, .sitx, .sea
	Winzip	Any	.zip
	<u>IMPORTANT:</u> These files contain one or more files within them which makes sending multiple files easier.
